## PROFILE

Third-year Computer Science Engineering student with a strong foundation in programming and data structures, proficient in C, Java, and web development. Experienced in building practical projects, including AI-powered applications, with a keen interest in software development and data-driven solutions. Passionate about problem-solving, continuous learning, and developing solutions.

## EDUCATION

**New Horizon College of Engineering, Bengaluru**

B.E in Computer Science and Technology | GPA: 8.07

**Shri Ram Global School, Bengaluru**

Class-12<sup>th</sup> PCMC | Percentage: 70

Bengaluru, Karnataka

September 2023 – present

Bengaluru, Karnataka

June 2021 - March 2023

## SKILLS AND COMPETENCIES

**Languages:** Python, C++, Java, JavaScript, HTML, CSS

**Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Networking Basics

**DevOps and Tools:** Git, GitHub, Docker (Basics), CI/CD Concepts, Linux (Command Line), Shell Scripting, Linux Command Line

**Web & Backend:** Frontend Development, REST APIs, Spring Boot (Basics)

**Databases & Tools:** MySQL, Cassandra, MongoDB, Git, Jupyter, Cursor AI

## PROJECTS

### Smart Resume Screener

November 2025

- Developed an automated resume screening system leveraging NLP and machine learning to model real-world recruitment workflows, with dedicated user and admin pages.
- Applied text preprocessing, feature engineering, and ML pipelines to score and rank resumes against job descriptions.

### AI-Powered Code Editor | Academic Project Winner

June 2025

- Developed an AI-assisted code editor using Monaco Editor (frontend) and Spring Boot (backend) with real-time editing and syntax highlighting
- Implemented intelligent code suggestions and multi-language support to enhance coding efficiency within unified interface technical innovation and awarded First Place in the 4th Semester Project Competition.

### AI Based Recipe Generator

August 2025

- Developed a food recommendation application that suggests recipes based on available leftover ingredients.
- Implemented logic to match ingredients with suitable recipes, enabling users to discover multiple meal options instantly.
- Generated detailed, step-by-step cooking instructions to guide users in preparing dishes using existing resources.

## CERTIFICATES

- Completed Web Development + DevOps Cohort certification by 100xDevs, gaining hands-on experience in web application development and system deployment.
- Introduction to generative AI and agents
- Introduction to machine learning concepts

## EXTRA-CURRICULARS AND ACTIVITIES

### Volunteer – NASSCOM Future Forge 2024

October 2024

- Assisted in managing event logistics and coordinated with team members to ensure smooth operations.
- Engaged with industry-leading professionals, gaining in-depth insights into the startup ecosystem and emerging market
