👤 PROFILE

I'm a second-year Computer Science Engineering student with a strong interest in AI, machine learning, and data-driven application development. Experienced in building practical projects like face recognition systems using Python. Passionate about using technology to solve real-world problems, with effective communication skills developed through prior involvement in Toastmasters.

🧠 TECHNICAL SKILLS AND INTERESTS

Languages: Python, C++, HTML, CSS, Javascript

Frameworks & Libraries: Flask, Pandas, NumPy, Matplotlib, Scikit-learn, OpenCV

Databases: MySQL

Data Science & ML: Data Cleaning, Handling Data Leakage, Feature Engineering

Area of Interests: Artificial Intelligence and Machine learning, Data analysis

Tools: Power BI, Git, Jupyter Notebook, VS Code

🎓 EDUCATION

Presidency School Bangalore South
12th

2023
Bengaluru, Karnataka,
India

New Horizon College of Engineering
Bachelor of Engineering in Computer Science and Technology

2023 – present
Bengaluru, Karnataka,
India

📁 PROJECTS

Face Detection & Recognition System (OpenCV, Python)

- Developed a real-time video streaming system with face recognition.
- Used Flask to integrate it into a web application.
- Implemented OpenCV and Face Recognition libraries for accurate detection.

House Price Prediction Model (Pandas, Scikit-learn)

- Conducted Exploratory Data Analysis (EDA) to a kaggle dataset to identify key housing market trends.
- Applied feature engineering and handled data leakage to improve model performance.
- Trained and evaluated machine learning models (Linear Regression, Random Forest) for price prediction.

📜 CERTIFICATION

- Kaggle: Introduction to Machine Learning [🔗](#)
- Kaggle: Intermediate Machine Learning [🔗](#)
- Fundamentals of Generative AI [🔗](#)
